Prepared for Retail Clients.

BNY Mellon Global Real Return Fund (EUR)

Euro A (Acc.)

INVESTMENT OBJECTIVE

To achieve a total return in excess of a cash benchmark over an investment horizon of 3-5 years. However, a positive return is not guaranteed and a capital loss may occur.

PERFORMANCE DISCLOSURE

Past performance is not a guide to future performance. The value of investments and the income received can fall as well as rise and investors may not get back the original amount invested.
Please refer to the prospectus, KIID and other fund documents for a full list of risks and before making any investment decisions. Documents are available in English and in selected local languages where the fund is registered. Go to bny.com/investments.
Returns may increase or decrease as a result of currency fluctuations.

INVESTMENT MANAGER

Newton Investment Management: Newton seeks to deliver strong outcomes to its clients by taking an active, multidimensional and engaged investment approach, applied across its active equity, income, absolute-return (including fixed-income), multi-asset and thematic strategies, and strategies with sustainability characteristics.

PERFORMANCE BENCHMARK

The Fund will measure its performance against 1-month EURIBOR + 4% per annum (the "Cash Benchmark"). The Cash Benchmark is used as a target against which to measure the performance of the Fund over 5 years before fees.
EURIBOR is the Euro Interbank Offer Rate and is a reference rate that is constructed from the average interest rate at which Eurozone banks offer unsecured short-term lending on the inter-bank market.
The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies disclosed in the Prospectus.

GLOSSARY

- Return Seeking Assets - Assets held in order to generate returns consistent with the performance aim of the fund and which have a higher element of risk than LIBOR (cash).
- Stabilising Assets & Hedging Positions – Assets and positions held in order to reduce the effects of market volatility and currency fluctuations inherent with holding return seeking assets.
- Return seeking assets net of direct index protection – The remaining exposure the fund has after the effect of downside protection has been considered.
- Rating Breakdown – Credit rating agencies, such as Standard & Poor's and Moody's Investors Service, assess the riskiness of debt issued by governments, organisations or companies. The agencies evaluate the financial strength of the issuer and the risk of default.
- Government Bonds – A debt security issued by a government.
- Investment Grade Bonds – Debt issued by companies which are rated BBB and above by the credit rating agency Standard & Poor's.
- High Yield Bonds – Debt rated below BBB by Standard & Poor's.
- Duration - How quickly a bond will repay its true cost - the longer it takes, the greater exposure it has to changes in the interest rate environment.
- Net Bond Duration - Duration including impact of hedging exposure using bond options and futures. Hedging aims to offset potential losses by investing in financial instruments (options and futures) that are dependent on the performance of underlying financial assets. Options and futures are contracts to buy or sell underlying assets at specific prices and/or times in the future.
- Yield (%) – The interest received from a fixed income investment, usually expressed annually as a percentage based on its cost and its current market value.

KEY RISKS ASSOCIATED WITH THIS FUND

- The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed.
- Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.
- Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Changes in Interest Rates & Inflation Risk: Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- Credit Ratings and Unrated Securities Risk: Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.
- Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- Environmental, Social and Governance (ESG) Investment Approach Risk: The Fund follows an ESG investment approach. This means factors other than financial performance are considered as part of the investment process. This carries the risk that the Fund's performance may be negatively impacted due to restrictions placed on its exposure to certain sectors or types of investments. The approach taken may not reflect the opinions of any particular investor. In addition, in following an ESG investment approach, the Fund is dependent upon information and data from third parties (which may include providers for research reports, screenings, ratings and/or analysis such as index providers and consultants). Such information or data may be incomplete, inaccurate or inconsistent.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

SYNTHETIC RISK & REWARD INDICATOR (SRRI) - EURO A (ACC.)

Lower risk ← → Higher risk

Potentially lower reward — Potentially higher reward

1	2	3	**4**	5	6	7

The Synthetic Risk and Reward Indicator is a number between 1 and 7 shown on all Key Investor Information Documents (UCITs KIID) to allow investors to compare funds' risk and reward profiles. 1 is the lowest and 7 is the highest.
The risk category was calculated using historical performance data and may not be reliable indication of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the UCITs KIID for more information.

If you are unsure which type of investment is right for you, please contact a financial adviser.

IMPORTANT INFORMATION
