Pictet - Clean Energy Transition - P EUR

NAV/share	EUR 186.31
Fund size (mio)	EUR 3 668
Positions	46

Important information

- Pictet-Clean Energy Transition (the "Fund") seeks capital growth by investing at least two-thirds of its total assets in shares issued by companies that contribute to the reduction of carbon emissions.
- The Fund's investments are concentrated in companies operating in the clean energy sector. The reduction in profitability of this sector will have adverse impact on the Fund's NAV.
- Sustainability risk: Environmental, social and governance related risk events or conditions could cause a material impact on the value of the investment if they were to occur.
- The Fund may have exposure to emerging markets including but not limited to China. Due to the political and economic situations in emerging countries, investment in the Fund presents, among others, greater legal, political, social, economic policy, volatility, currency, exchange, tax, capital repatriation and liquidity risks.
- Investors should not only base on this marketing material alone to make investment decisions.

Pictet - Clean Energy Transition - P EUR

INVESTMENT OVERVIEW

The sub-fund seeks capital growth by investing at least two-thirds of its total assets in the shares of companies worldwide that contribute to and benefit from the switch to lower-carbon energy sources. The sub-fund favours companies operating in the field of cleaner infrastructures and resources, carbon-reducing technologies and equipment, the generation, transmission

and distribution of cleaner energy and energy efficiency.

Reference Index

MSCI AC World (USD), an index that does not take into account environmental, social and governance (ESG) factors. Used for risk monitoring, performance objective and performance measurement.

Value of 100 EUR invested since 31.03.2016 (Net of fees*)

Current index: MSCI AC World (EUR) valid from 14.05.2007

*Including actual ongoing charges and excluding subscription/redemption fees and taxes borne by the investor.

PERFORMANCE DISCLOSURES

The published performance represents past data. Past performance may not be a reliable guide to future performance. There is no guarantee that the same yields will be obtained in the future. The value and income of any of your

investments may fluctuate with market conditions and may lose some or all its value. The fund may be affected by changes in currency exchange rates, which can have an adverse effect on the value or income of the fund.

Past performance may not be a reliable guide to future performance. All forms of investment involve risk. The value of investments and the income derived from them is not guaranteed and it can fall as well as rise and you may not get back the original amount invested. Please refer to the Risk Considerations and to the prospectus for more information.

RISK CONSIDERATIONS

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The risk indicator assumes you keep the product for 5 year(s). The actual risk can vary significantly if you cash in at an early stage and you may get back less. This product may be exposed to further risks that are not included in

the Summary Risk Indicator, for example:

- Currency risk: where your reference currency differs from the currency of the share class, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the reference currency and your local currency.
- Financial derivatives risk: the leverage resulting from derivatives

amplifies losses in certain market conditions.

- Sustainability risk: the risk arising from any environmental, social or governance events or conditions that, were they to occur, could cause a material negative impact on the value of the investment.

Further information can be found in the prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment.

FINANCIAL GLOSSARY

Alpha

Alpha shows the percentage performance of a fund above or below that explained by its exposure to the broader market.

Annualised volatility

Annualised volatility is a risk indicator showing the extent of the price fluctuations of a security or fund unit compared to its average price over a given period. The higher the volatility, the greater the fluctuations.

Beta

Beta shows the average extent a fund's return moves relative to the broader

market. A fund with a beta above 1 moves on average more than the market and below 1 moves on average less than the market.

Conversion fee

Fee paid for the transfer of shares of one unit/share class to another unit/share class.

Correlation

Correlation shows how a fund's return moves in relation to the benchmark. Highly correlated investments tend to move up and down together while this is not true for investments with low correlation.

Information ratio

The information ratio is a way of measuring the value added by the portfolio manager relative to a benchmark. It is a measure of the risk-adjusted return of a portfolio and is calculated by dividing the active return (portfolio return minus benchmark return) by the tracking error.

NAV

An acronym of net asset value.

Order deadline

Deadline for remittance of orders to the

transfer agent in Luxembourg as set out in the relevant annexes to the prospectus. You may be required to submit your orders to your financial advisor or fund distributor by an earlier cut-off time.

SRI

The Summary Risk Indicator (SRI) is defined by the PRIIPs regulation and is designed to show the relative risk of a product, using a combination of market and credit risk measures.

Sharpe ratio

The Sharpe ratio shows the fund's risk-adjusted performance. It is calculated by dividing the excess return (portfolio return minus risk free return) by the volatility.
